

Brain Ball

- 1. Write math facts ($2+3=?$ $7-4=?$ $5\times 9=?$) all over the ball with a permanent marker.**
- 2. Two students play catch with the ball. Upon each catch, students must read the problem under their right thumb and give the answer.**

***Do this with vocabulary words. Have them use the word their thumb lands on in a sentence.**

-
- 1. In each of the 6 colored sections, write a question with a permanent marker.**
 - 2. Throw the ball to a student in the class. That student must read the question under their right thumb and give the answer.**
 - 3. Throw the ball to another student in the class. That student must read the question under their "right pinky" (or whatever finger you call out...index, longest, ring, etc.)**
