

Pass The Chicken

Have students sit or stand in a circle.

Choose a student to start. Give that student the chicken, and ask that student to name the addition fact family for the number 10.

As that student starts to say "1 + 9..." he/she begins to pass the chicken consecutively around the circle. The chicken goes around the circle while this student finishes the answer "...2+8, 3+7, 4+6, 5+5."

If the chicken gets back to the student before he/she has finished correctly stating the fact family, then that student has to sit in the center of the circle. And that student tosses the chicken to the student of his/her choice.

If the chicken doesn't get back to the student as he/she finishes the correct list, then whoever has the chicken gets the next question: "Name the addition fact family for the number 12."

Play continues until you are out of instructions for the students 😊

Other Ideas

- *Name 3 states in the Midwest. *Name 2 states that border Mexico. Etc.
- *Name 3 elements that are metals. *Name 2 elements that are noble gases. Etc.
- *List the factors of 10. *List 5 multiples of 2. Etc.
- *State 3 proper nouns. *State 3 action verbs. Etc.
- *Name 3 characters in Charlotte's Web. *Name 1 thing Charlotte writes. Etc.
- *Name 3 animals that are mammals. *Name 2 animals that are reptiles. Etc.
- *List 3 countries in Europe. *List 2 cities in France. Etc.
- *State a contraction and the 2 words that make it. Etc.
